ScriptSure is the #1 application for electronic prescribing!

ScriptSure is Electronic Prescribing with Unprecedented Ease and Functionality!

Certifications / Eligibility / Interfaces / EMR. ScriptSure is a GOLD Certified product with SureScripts giving you full electronic capability. ScriptSure meets all the requirements of the Centers for Medicare and Medicaid Services (CMS); users are eligible to receive CMS reimbursement incentives and avoid CMS penalties! ScriptSure can function as a stand-alone program or communicate with other software to share patient data via HL7, web services, ODBC links, XML or custom interfaces. ScriptSure is not just E-Prescribing; easily add modules that make-up a full electronic medical record (EMR*). Get notes, lab test, patient portal, document imaging/scanning, patient disease information, patient scheduling and more.
*Office of the National Coordinator (ONC-ATCB) certified for Complete EHR Ambulatory.

The screenshot displays the ScriptSure software interface. On the left, a sidebar shows 'All History' and 'Current Medications: 1'. The main window lists a patient's medication history with columns for Status, Visit Date, Drug Name, Drug Format, Refill, Expiration, User, Substitution, and Doctor. Two entries are visible: a New Prescription for Crestor (11/18/2013) and a Change in Dose for Xanax (10/21/2013). Below this, a 'Patient Joan' profile is shown with her photo, DOB (1/1/1980), and chart ID (2631). The interface includes tabs for HOME, CHART, DRUG, NOTE, QUICK NOTE, EDUCATION, LAB TEST, IMAGING, CONSULTANT, and SUMMARY. A 'Needs Attention' section on the left shows a calendar for November 2013 with a green indicator for the 29th. The right side of the screen shows a 'Prescription Preview' for Patient Joan (Female) for CeleBREX oral capsules, 200 mg Cap, with a quantity of 30 and a frequency of Once Daily. The preview includes fields for Drug Name, Dose, Quantity, Route, Capsule, Sig, Frequency, Descriptor, Refill, and Status. It also has sections for Comment, Medication Comment, Diagnosis, and Duration.

Recommended Computer Specifications:

Intel® i5 Processor 2.4Ghz+
Microsoft® Windows 7 or Windows 8
4GB+ of system memory
300GB+ of available space
1366x768 or higher (1600x1200 or better optimal)
Star Micronics® Prescription or HP® compatible printer
High-Speed Internet Access
