

ScriptSure Software 2017 Computer Requirements

For more information on ScriptSure products, visit: <http://www.dawsystems.com/products.html>

ScriptSure Installed Locally In Office

ScriptSure client application is optimized for Windows® 10 Operating System, but is compatible with Windows® Vista, 7 and 8. (Windows XP is no longer a supported OS from Microsoft). ScriptSure is a **CLIENT-SERVER** application. The patient data resides on one computer (Server) in your office and the other computers (Clients) must be on the same network as the Server in order to function. *For small offices, the Server and the Client installs can be on the same computer.* The specs below are for the Client computer(s), however, a computer with the *Recommended Components* below specifications will be able to act as a Server for up to 3 computers. Four or more computers will require a more powerful computer (please contact sales for more information on the required specifications for a Server). The Server computer should always be the most powerful computer in the office.

| | Minimum Components* | Recommended Components |
|-----------------------------|--|--|
| Processor | Intel® Core™ i5 processor (3M Cache, 3.30+ GHz) or better <i>32-bit or 64-Bit computer (64-bit preferred)</i> | Intel® i7 Processor 3.00GHz+, (i5 or i7 Processor) <i>64-Bit computer</i> |
| Operating System | Microsoft® Windows® Vista® / Windows® 7 / Windows® 8 & 8.1 | Microsoft® Windows® 7 - 64-Bit OS (or Windows® 8.1) |
| Memory | 6GB of system memory | 8GB+ of system memory |
| Hard Drive | 500GB of available space | 1TB+ of available space |
| Screen Resolution | 1280x960 or higher | 1600x1200 or higher |
| Printing** | Star Micronics® Prescription Printer or Laser Printer | Star Micronics® Prescription Printer |

**Windows® XP® is no longer supported for ScriptSure software products as of April 14, 2014 due to Microsoft sunsetting the OS.*

***Available from Daw Systems, Inc.*

ScriptSure deployed via hosted site (Web-Based)

Daw Systems also offers a Hosted version of ScriptSure. Instead of installing the software directly on your computers, we simply configure your computers to remotely connect to our (web-based) secure datacenter using Windows® Remote Desktop Connection. Additional costs apply for use of the Hosted Site. NOTE: Windows® XP® is no longer supported for ScriptSure software products for Hosted Site (SaaS Model).
